Mask Sterilization Machine
UV - C
Disinfection

group **alpna**
DRIVEN BY TECHNOLOGY

Airborne micro organisms such as viruses, bacteria, yeasts and mold are especially present in heavily frequented areas such as airports, hospitals and quarantine centers.

They jeopardize the health of people, contaminate raw materials, and cause food to spoil,
UV radiation reliably reduces the germ load and improves hygiene and storage conditions.
In particular, short-wave UV radiation has a strong bactericidal and virus killing effect. The radiation is absorbed by the microorganisms' DNA destroying its structure hence arresting further growth bringing end to infection.

SAFE
NO Harmful ozone

RELIABLE
5-Minute Disinfection

EASY
One Touch Operation

Various size and configuration available

Benefits
**Your Advantage With UV Light**

- Safe and reliable desinfection of rooms

- Protection against germs and pathogens

- Low space requirement makes retrofitting easy

- High-performance lamp technology: optimized output of 254 nm UVC radiation (highly desinfectant especially for viruses like COVID 19)

- Easy to handle and operate

Application Areas
UV Light as a Solution for your application in

- Food-processing and pharmaceutical industry

- Hospitals, doctor's offices, laboratories, clean rooms, storage rooms, offices, heavily frequented areas such as airports, Quarantine Centers etc.

- Livestock stables

- HVAC system cooling coils and filters

Silent Carriers of Virus

Bags • Travel suitcase • Clothes • Rucksack • Handbags • Laptop Bag • Hat

Why Alpna

Global Presence

We have a strong network of 800+ resellers and agents spread in 11 countries with over 153000 installations

Indigenous Manufacturing

Each component of our product is engineered to highest precision and meticulously designed.

MAKE IN INDIA

Excellent Service

We have a strong service network and various warranties available on every product

R&D

Our engineers are constantly innovating products to positively impact industry and work towards saving environment and energy
